

Mobil-O-Graph ABPM

A lightweight, comfortable and easy to use Ambulatory Blood Pressure Monitor

Mobil-O-Graph has been awarded the highest possible A/A grade for accuracy by the British Hypertension Society and is ideal for the busy GP surgery. It offers full integration with the EMIS, TPP SystemOne and InPS Vision clinical systems. Mobil-O-Graph is supplied with all required software and accessories and a market leading 7 year warranty.

Safer, Faster, Easier- I³ Integration

Mobil-O-Graph is compatible with Numed's I³ integration software*, which automatically retrieves a patient's details from EMIS, TPP SystemOne or InPS Vision and files a PDF report and up to 6 ABPM Read codes upon test completion to their medical record.

This offers a number of benefits to both you and your patients:

Enhances Patient Care

Dramatically simplifies the ABPM test procedure, allowing you to concentrate on caring for your patients

Improves Patient Safety

Ensures test results are always filed to the correct medical record, improving patient safety

Improves Quality

Files a high quality ABPM report rather than a poor quality scan, for a more accurate diagnosis

Reduces Administration

Eliminates manual data entry, scanning and attachment of test results, giving you more time with your patients

See I³ in action on our website: www.numed.co.uk/i3

What do our customers think?

“The Mobil-O-Graph device is so easy to use and our patients find it much more comfortable than the previous ABPM. Our nurses find it extremely simple to use thanks to the I³ integration software.”

Kay Towler, Practice Manager - Burton & Bransgore Medical Centre

Peace of mind - MediServe Support

Faulty diagnostic equipment can be a major inconvenience, leading to delays in consultations and even the cancellation of appointments. Mobil-O-Graph is supplied with our unique MediServe support package**, which includes:

- Unlimited technical support from a dedicated support team
- Full equipment repair cover including parts and labour
- Loan equipment when yours is being serviced or repaired
- Full annual service and calibration to manufacturer's specification

This will give you the peace of mind that your service will continue to run smoothly no matter what may happen.

Confidence in your new equipment – Installation & Training

It is vital that you are confident in the use of your new diagnostic equipment. For a small fee our dedicated customer support team can:

- Install your new product at a date and time that is convenient for you and in as many consulting rooms as you require
- Ensure you get the most out of your new device through a wide range of training options, including training videos in our dedicated support section, remote webinar sessions and on-site training*** if required

Mobil-O-Graph ABPM Additional Features:

- **Auto-Feedback-Logic**
Prevents discomfort caused by cuff over-inflation
- **Silent Operation**
Unobtrusive system with almost silent cuff inflation
- **Small and Lightweight**
For ease of use and improved patient comfort
- **Multiple Report Formats**
Including average values and a blood pressure profile
