

Easy On PC (Trueflow)

PC Based Spirometer

The only spirometer offering full integration with InPS Vision!

- Automatic transfer of Read coded information (FEV1, FVC, FEV1%, PEF etc) into Vision.
- Automatic filing of PDF spirometry reports to Vision.
- Saves time by automatically entering patient details into spirometry software from the clinical system.
- Quick and simple to use, allowing the nurse to focus on nursing rather than data entry.
- Eliminates data entry errors.

Features and Benefits

- Fully integrated with InPS Vision
- PDF report format is compatible with most electronic referral systems
- Easy to use full function PC spirometry software
- Fully complies with BTS and ERS standards for respiratory measurement
- Ergonomically designed disposable spirettes for unbeatable cross infection control
- No cleaning required (when using single use version of spirette)
- No batteries required – powered directly via PC
- No calibration adjustment ever necessary
- Low running costs
- Exceptional accuracy for low flow measurement – ideal for COPD patients
- Automatic predicted values calculation with Ethnic correction factors
- 'Real time' Flow/Volume and Volume/Time graphs
- Test quality assessment to ensure accurate results
- NICE 2010 interpretation and Lung Age estimation
- Reversibility testing with '% change' calculation
- Trending facility
- Clear printout format with Flow/Volume and Volume/Time curves
- Expiratory measurements unaffected by ambient temperature, humidity or barometric pressure changes for ultimate accuracy

Leasing options available. Please enquire

- Calibration verification feature
- Fletcher-Peto curve can be included on report for smokers
- Supplied in a tough carry case
- Dimension of PC sensor - 16 x 3 x 7cms, Weight - 155g, Cable length - 1.8m

"The TrueFlow spirometer is simple to use and provides quick results directly onto the patient's computer records which saves time during consultations"

Catherine Wright, Practice Manager, Ventnor Medical Centre, Isle of Wight
