

# Samaritan PAD

## Defibrillator

**250,000 people every year in the UK suffer from Sudden Cardiac Arrest. What would you do if this happened on or around your premises? It has been proven that CPR alone increases the chance of survival by 2%. With a defibrillator programme the chance of survival increases to over 50%!**

The Samaritan PAD (Public Access Device) is a very easy to use defibrillator. Its simplicity and speed of use makes it ideal for any setting whether medical professionals are present or not. This highly dependable device is exceptionally easy to manage as it has only one expiry date due to the innovative and unique PAD-PAK™ which contains both the electrode pads and the battery.

### Features and Benefits

- Very easy to use, reliable and durable
- Unbeatable ergonomics with only two buttons – ‘On/Off’ and ‘Shock’
- Rescuer is verbally reminded to “Call for Medical Assistance”
- Patented SCOPE™ Biphasic technology ensures optimal defibrillation
- Clearly indicates to rescuer when it is safe/unsafe to touch the patient
- CPR tone and flashing icon coach the rescuer in delivering chest compressions
- Auto self test minimises maintenance
- Replacement PAD-PAK™ quickly refreshes electrodes and battery at once
- Pediatric-PAK™ is also available for patients aged 1-8 years and less than 25kg
- Weighs just 1kg – lighter than other devices on the market
- Manufactured in the UK by a global market leader
- Supplied with rugged carry/storage case

**TURN ON**

**FOLLOW  
PROMPTS**

**PRESS SHOCK  
BUTTON**

### How it Works

1. Flashing green ‘status’ indicator shows that the device is fully operational
2. Green tab is pulled to access the PAD-PAK™ defibrillation electrodes
3. Three simple icons and calm verbal instructions guide the rescuer through each stage
4. Electrodes are applied and auto assessment determines if a shock is actually required
5. If a shock is necessary, the ‘shock’ button illuminates to be pressed combined with a verbal command
6. Rescuer is guided through the CPR process in accordance with ERC/AHA guidelines

*“After long deliberation, and looking at the substantial range of defibrillators and their features and benefits, we chose the Samaritan PAD from Numed Healthcare. It provided the ‘full solution’”*  
Susan Dexter, Chevron UK Ltd
